

Addendum to Page 46

(Per White River Flowage Lake Management District)

Lake Management Plan Page: 46

Goal 10. Encourage Lower White River Flowage stewardship through communication.

Objective 10.1 Develop opportunities for education and outreach among full and part-time residents. .

2005 – Present The District maintains a website (www.whiteriverflowage.org) and posts all meeting notices, Board and District meeting minutes, current Board Member contact information, and links to several related sites. Additionally, the District maintains a contact list of all property owners within the District. New members receive a welcome letter with information about the history, function, and goals of the District. Welcome packets from the Waushara County Watershed Lakes Council (WCWLC) are provided to new members as requested. One of the Board Members attends all WCWLC to keep the District informed of any pertinent updates. All members are notified by e-mail or postal mail two weeks in advance of the two District meetings (one in late April and one on Labor Day weekend) with the agenda (and budget for the Annual Meeting) plus a copy of the previous meeting's minutes. Meeting notices are also posted at the two landings and the Budget Hearing/Annual Meeting notice is also published in the local newspaper. Guest speakers are invited, whenever possible. Refreshments are provided by the White River Flowage Association, a voluntary social offshoot of the District which participates in the brat fry fundraiser at Stone Ridge. The District maintains communication with Eagle Creek, owners of the dam on County YY, as needed.
