

Addendum to Page 45

(Per White River Flowage Lake Management District)

Lake Management Plan Page: 45

Goal 9. Provide access to the flowage and adjacent public lands for enjoyment and management.

Objective 9.1 Safe access to the lake and surrounding public lands will be provided.

2018 – After complaints from the District about several deep holes in the water by the White River Trail landing made it difficult to launch the harvester, the Town of Dakota contracted with Hartwig Excavating to fill the holes with large stones and gravel.

2022 – Following up on a request from the District, the Town of Dakota extensively improved the Pine View Drive landing by repairing the access ramp, building a border wall with large boulders, and adding gravel to the parking lot.

2023- The Town of Dakota improved the White River Trail landing by adding crushed blacktop to the entrance road by the landing. Some refinement work was also done to the ramp at the Pine View Drive landing.
